

<b>Introduction</b>	GSA Capital Partners LLP ("GSA") is authorised and regulated in the United Kingdom by the Financial Conduct Authority ("FCA") as an Alternative Investment Fund Manager ("AIFM") under the EU Alternative Investment Fund Managers Directive ("AIFMD"). GSA primarily manages a series of Cayman Islands and Delaware Alternative Investment Funds ("AIFs") which are governed by AIFMD. Additionally, GSA carries out certain portfolio management activities on behalf of third party managed accounts ("MACs") under regulatory permissions granted to it under the EU Markets in Financial Instruments Directive and its supplementary regulations and clarificatory publications ("MiFID II"). This GSA Best Execution Report 2018 (the "Report") is published by GSA in accordance with its best execution obligations under MiFID II and in line with industry guidance. The report provides both quantitative and qualitative summary information in relation to its best execution activities, on both a direct execution and indirect execution basis, in relation to certain MiFID II-defined financial instruments on behalf of those MACs for which GSA provides investment management services. Please note therefore that this information contains no data, analysis or commentary in relation to GSA's transaction activities in relation to any of its AIFs, and accordingly this Report should not be considered a representation of GSA's entire trading activities during the reported period.

**B. Qualitative Summary Information**

<p><b>Financial Instruments (Indirect Execution) included within this report</b></p>	<p>Equities – Shares &amp; Depositary Receipts (from 2000 trades per day)  Equities – Shares &amp; Depositary Receipts (from 80 to 1999 trades per day)  Equities – Shares &amp; Depositary Receipts (from 1 to 79 trades per day)  Interest rates derivatives - Futures and options admitted to trading on a trading venue  Currency derivatives - Futures and options admitted to trading on a trading venue  Equity Derivatives - Options and Futures admitted to trading on a trading venue  Commodities derivatives and emission allowances Derivatives - Options and Futures admitted to trading on a trading venue</p>
<p><b>Financial Instruments (Direct Execution) included within this report</b></p>	<p>Debt instruments - Bonds  Currency derivatives - Swaps, forwards, and other currency derivatives</p>
<p><b>Execution Factors &amp; Observations (Direct &amp; Indirect Execution)</b></p>	<p>GSA considers various execution factors depending on the transaction to be undertaken. Those factors include:</p> <ul style="list-style-type: none"> <li>• Price of asset bought or sold</li> <li>• Explicit costs or commissions of execution</li> <li>• Implicit costs or commissions of execution, e,g, non-commission financing costs implicit in the transaction</li> <li>• The current ascertained liquidity for the relevant instrument</li> <li>• The size and nature of the orders</li> <li>• The execution capability of the counterparty or venue – speed, responsiveness and consistency of execution</li> <li>• Counterparty risk exposure: counterparty's financial status</li> <li>• The efficiency of the settlement process post-execution</li> <li>• Any other factor deemed relevant for a positive client order outcome.</li> </ul> <p>In 2018, for the transactions executed on behalf of its MAC Clients in the types of securities mentioned above, GSA acted in the best interests of its clients and executions remained consistent with GSA's order execution policy. GSA monitored the effectiveness of its order execution policy to ensure that it identified and corrected any deficiencies (none were observed during the period). Price and costs proved the dominant execution factors prioritised by GSA when attempting to seek the best possible result. Whilst GSA does not seek specific instructions from its clients in relation to the execution of any order, it should be highlighted that, in 2018, all MAC clients limited their execution capability to one execution counterparty. Whilst GSA may recommend another execution counterparty be appointed to improve best execution optionality, such appointment remains the prerogative of the MAC client, and GSA's ability to source alternative liquidity in line with its execution factors is accordingly restricted. However, GSA is able to observe equivalent transaction quality in transactions it undertakes for its AIF clients, and accordingly remains satisfied that the counterparties appointed by its MAC clients remain of suitable quality for its clients' purposes.</p>
<p><b>Execution venues &amp; brokers: description of any close links, conflicts of interest and common ownership</b></p>	<p>GSA had no close links, conflicts of interest or common ownership issues to report in relation to any of its execution venues and brokers in 2018.</p>
<p><b>Execution venues: details of specific arrangements regarding payments made or received, discounts, rebates or non-monetary benefits received</b></p>	<p>GSA had no such specific arrangements to report in 2018.</p>
<p><b>Execution venues: explanation of any changes to the list of venues contained in the firm's order execution policy, if such a change occurred</b></p>	<p>No changes were made.</p>
<p><b>Client categorisation: explain any difference in order execution as a result of any differences in client categorisation</b></p>	<p>GSA made no differentiation in its execution policies according to client categorisation in 2018.</p>
<p><b>Execution data &amp; tools relating to execution quality: explain use (if any)</b></p>	<p>GSA utilises a proprietary Transaction Cost Analysis ("TCA") system to generate in depth execution quality reports on a routine basis. The reports are reviewed by front office and Compliance, with any outliers flagged for investigation in regular meetings with key stakeholders.</p>
<p><b>Consolidated tape provider: explain any use of such services</b></p>	<p>GSA made no use of a consolidated tape provider in 2018.</p>
